"**Soul Transfer**" is a social networking application on android. It has a very simple UI with 2 circular buttons, one in Red denoting problem to share and the other circular button in sky blue denoting a solution to share.

"Soul Transfer" app is location-based which means users in a radius of 1 k.m. only can listen to audio recordings of both problems and solutions. Thus users generally get to know speech (maximum 1-minute duration) of their 1 k.m. radius locality.

"Soul Transfer" app needs login credentials with a mobile number as OTP only after installation in android smartphones.

The searching for audio clips max 1-minute algorithm is confidential where users only need to submit a single-digit number e.g 9 or 3 0r 2 or 4 etc. in the range of 1-9. Only the audio clips, uploaded to the server from the GPS location, within a range of 1 km radius will be selected to play by the users randomly with the algorithm.

The purpose of the "Soul Transfer" app are as follows:

- Any user will get to enlighten with problems and solutions by users in the 1 km radium locality.
- Visitors or Tourists would get to know the localised society.
- Collective knowledge about problems and solutions in day-to-day life.
- The creativity of 1-minute speech any time anywhere.
- Understanding of society we live in from a small locality to globally.
- Empowering women to freedom of speech by separating problems and solutions speech.
